# Electronics Packaging System

A product of *Nortek Automation Inc.*

## Retail Packaging For Electronics

The Electronics Packaging System is a rotary workstation that automatically places your PCB and product literature into a retail clamshell package, closes the clamshell lid and secures the final package with a wrap around security label. The label may contain print on demand information such as serial numbers, bar codes, 2D code or date codes. The system's multiple stations replace many steps of costly, error prone manual labor. The compact rotary design saves floorspace. Packaging is quick, efficient and accurate.

## *NORTEK AUTOMATION INC.*

Providing Solutions Through Automation Since 1985

### WORLD HEADQUARTERS

15632 Producer Lane, Huntington Beach, CA  92649 USA
Phone (714)895-8590*Fax (714)895-8039
